Seunghyun Lee

Curriculum Vitae

Address: London, UK
Email: seunghyun.lee241@gmail.com
Website: s-lee24.github.io

Research Interests

Harmonic Analysis, Analytic Number Theory, Formalisation of Mathematics

Education

MSci in Mathematics, Imperial College London — Sep 2023-Jun 2027

Papers

1. *Classification of λ-translators in the Lorentz-Minkowski space* with Marie-Amélie Lawn, Miguel Ortega, Preprint (In Progress).

Research Experience

- Final Year Dissertation, Imperial College London — Oct 2026-Jun 2027
- Summer Research Programme (UROP), Imperial College London — Jul 2025-Sep 2025
  λ-translators in the Lorentz-Minkowski space
- 2nd Year Research Project, Imperial College London — May 2025-Jun 2025
  The endpoint case of the multilinear Kakeya estimate
- 1st Year Research Project, Imperial College London — May 2024-Jun 2024
  Finding eigenvalues and eigenfunctions of compact operators

Talks

4. DRP Symposium, Imperial College London — Jan 2026
   Hausdorff dimension and Kakeya sets
3. 3-minute UROP Thesis Competition, Imperial College London — Oct 2025
   λ-translators in the Lorentz-Minkowski space
2. 2nd Year Research Symposium, Imperial College London — Jun 2025
   The endpoint case of the multilinear Kakeya estimate
1. 1st Year Research Symposium, Imperial College London — Jun 2024
   Finding eigenvalues and eigenfunctions of compact operators

Honours

- Best Insight Prize, ASA Datafest — Mar 2026
- Best Presentation Award, Imperial College London — Oct 2025
- UROP Prize, Imperial College London — Oct 2025
- 1st Place Team, QRT Quant Challenge — May 2025
- UROP Departmental Bursary, Imperial College London — May 2025
- Dean's List, Imperial College London — Oct 2024

Teaching & Mentoring

Imperial College London

- *Tutor for 1st Year Students* Autumn 2025, Spring 2026
  Analysis 1, Linear Algebra and Groups, Calculus and Applications, Probability and Statistics
- *Research Mentor*, Directed Reading Programme Autumn 2025
  Hausdorff dimension and Kakeya sets

Conferences & Workshops Attended

- Undergraduate Summer School, London Mathematical Society Jul 2025

Skills

Programming: Python, C++, LaTeX, Lean (Proficient); R, MATLAB (Familiar)

Languages: Korean (Native), English (Fluent).
